About the Data

The Graduate Outcomes Report provides insight into the initial career paths of graduate students after completing their programs at Notre Dame. Data is collected through an online survey administered by Institutional Research, Innovation, & Strategy (IRIS) before commencement each term in January, May, and August. Content of the Graduate Outcomes Report includes information on initial outcomes (employment, further education, etc.), employing organizations, and job titles. “Employed-academia” includes academic positions that are tenure-track, research, or teaching at higher education institutions. “Employment - industry/professional includes non-academic employment. “Other” outcomes include graduates engaging in volunteer work, freelance work, internships, contract work, etc.

The Meruelo Family Center for Career Development conducts follow-up research with recent graduates up to one year after graduation to obtain the most accurate information about graduates’ post-graduation plans. This report includes data from the last 10 years (academic years 2021-22, 2020-21, 2019-20, 2018-19, 2017-18, 2016-17, 2015-16, 2014-15, 2013-14, and 2012-13). Unless otherwise noted, years are combined. In order to protect graduates’ identities, data is omitted when the count is fewer than 5.

The data in this report includes the Graduate Outcomes for the College of Engineering.

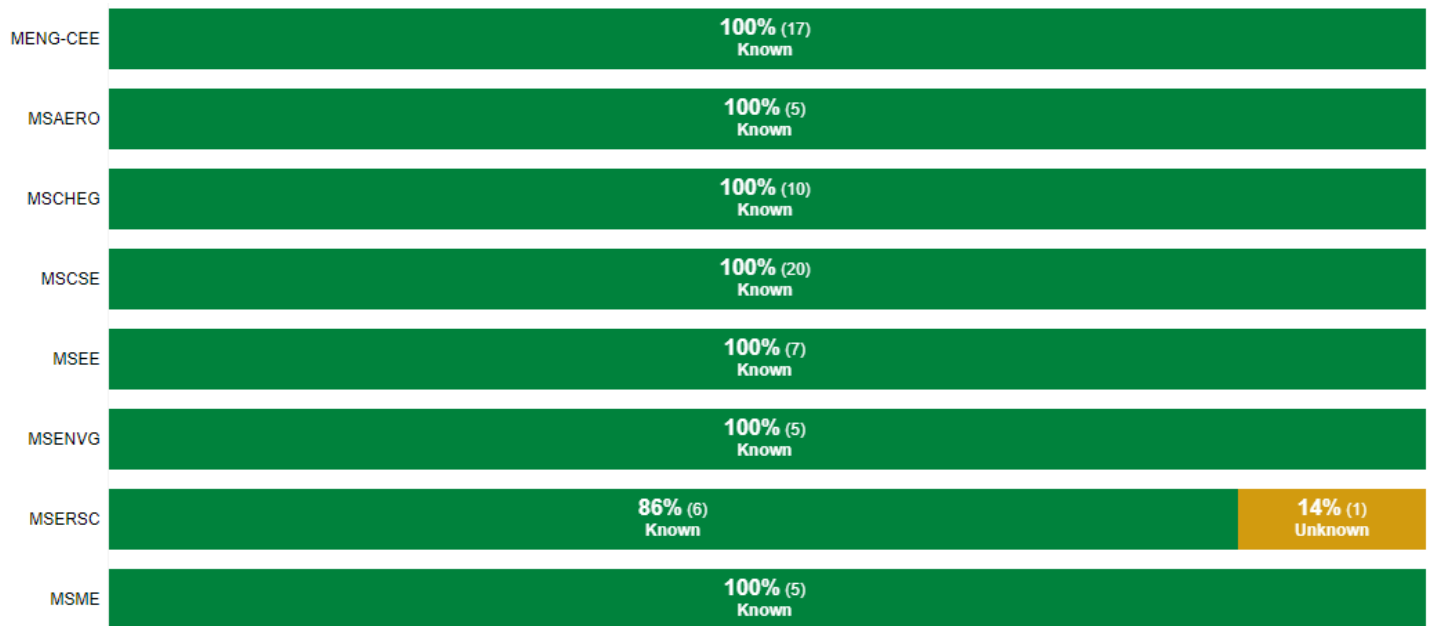

Knowledge Rate

Over the last 10 years, the College of Engineering has had a knowledge rate of 96%. Data is collected through surveys, LinkedIn research, and internal communication with each program to obtain the most accurate information about post-graduation plans.

Knowledge Rate By Program

Below is the knowledge rate by program. Programs with fewer than 5 graduates have been excluded.

Post-Graduation Status

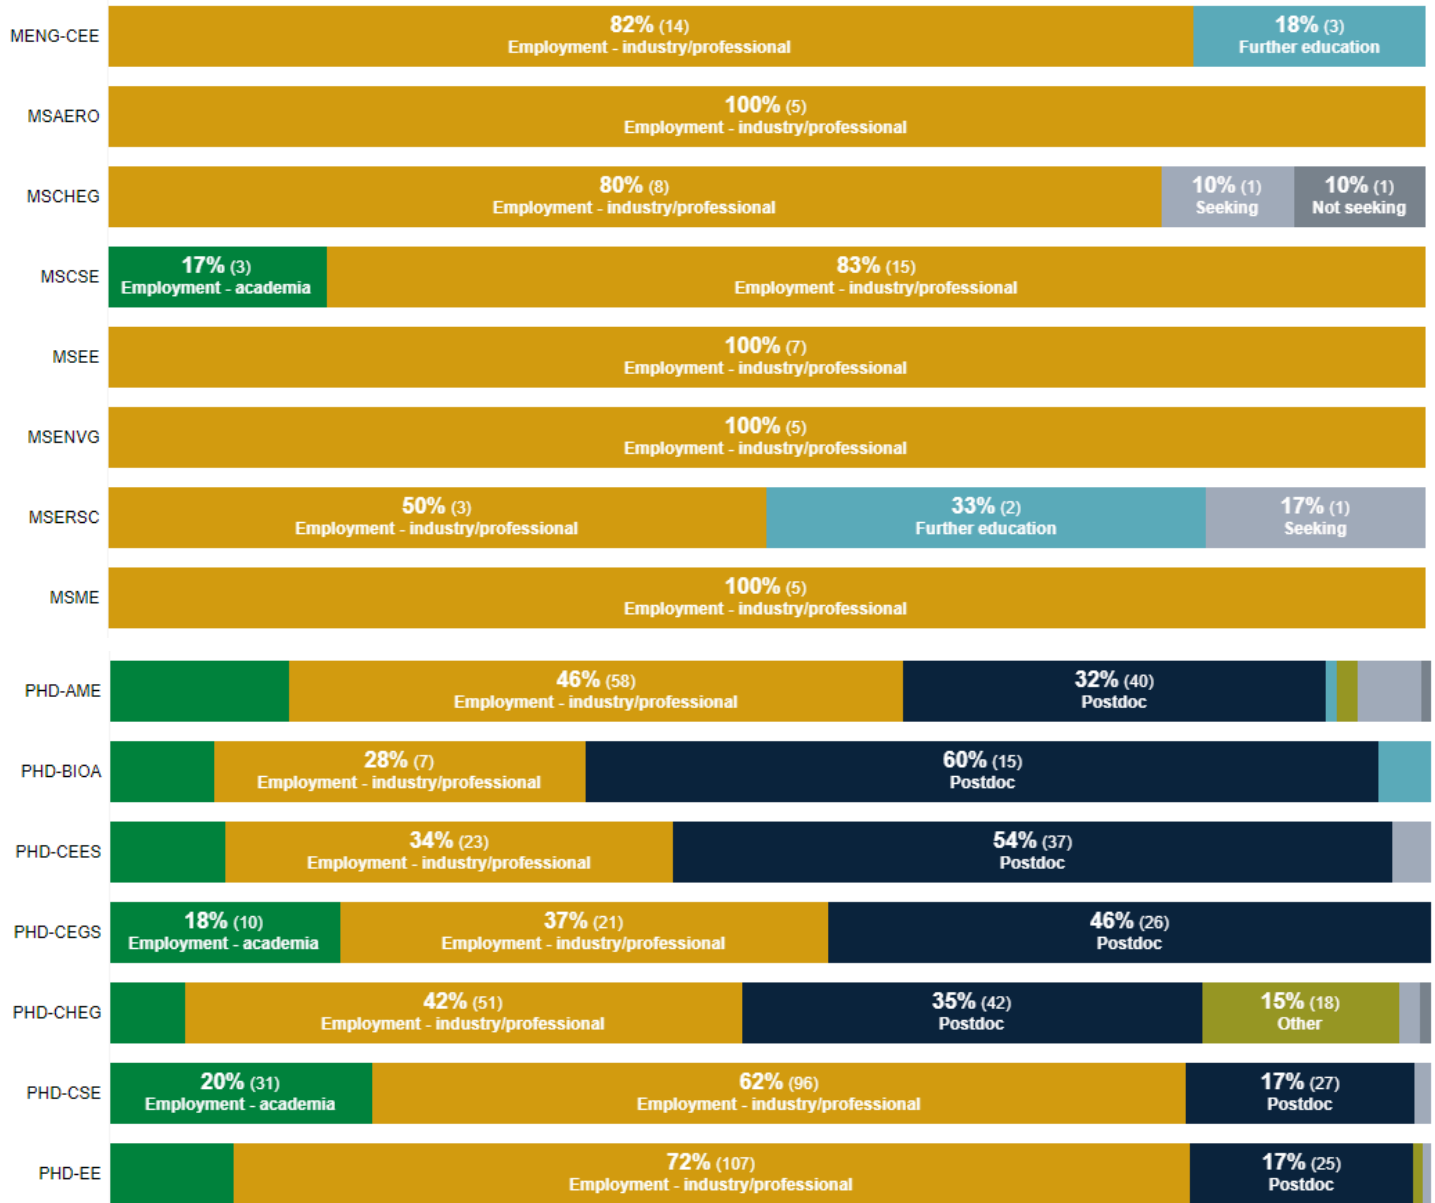

Below is the post-graduation status for the College of Engineering over the last 10 years. “Employed-academia” includes academic positions that are tenure-track, research, or teaching faculty at higher education institutions. “Employment - industry/professional” includes employment in industry, non-profits, startups, higher education administration, and other non-faculty employment. “Other” outcomes include graduates engaging in volunteer work, freelance work, internships, etc. Students with unknown status are excluded in the calculations below.

Status	#	%
Employment - academia	90	12%
Employment - industry/professional	428	55%
Postdoc	217	28%
Further Education	7	1%
